The factors which influence customers...

SDLG LG936L

Machine Walkaround – Starting point

ALL

- Where to introduce my products is OK.
- We recommend the starting from the front of SDLG LG936L.
- Remember what is customer value most when buying machine.
 - ✓ Special configuration
 - ✓ Customer perception
- This part will be based on the characteristics and advantages of loader, let the customer know its value and benefit.

SDLG LG936L

Standard bucket

ALL

Feature:

- Standard bucket capacity 1.8 cubic meters.
(E3623115Q29 with standard 2.5m³ LM bucket)
- Rear strengthen the high barrier.
- The butcher plate and wearing plate adopt wear-resisting material.
- The bucket bottom and side panel adopts flitch to strengthen.

Benefit:

- To prevent the material after the throw damaging the work device.
- More wear-resisting, improve more than 60% in the service life.

SDLG LG936L

Z-bar linkage

ALL

Feature:

- Optimization design Z-bar linkage.
- Using enhanced movable arm and beam, continuous intelligent welding technology, blasting treatment after welding.

Benefit:

- Large transmission ratio, improve ground lifting force and shovel digging force.
- More reliable and more efficient, longer working life.

SDLG LG936L

Front lights and working lights

ALL

Feature:

- Equipped with 2 set of high-power Hella headlamp, wide range, high installation, increase protection and conform to the E-Mark certification.
- Bridge before and after the top is equipped with four Hella work lamp.
- LED lamps as an option.

Benefit:

- Significantly enhance performance, improve dark environment operation safety and effectively prevent litter damage.
- Optimize collocation installation, ensure good lighting

SDLG LG936L

Center Hinge & Frames

Feature:

- Articulated center close to the layout, articulated distance widened design.
- **The steering limiting flexible cushion design.**
- Tapered roller bearings, strengthening seal design.

Benefit:

- Excellent stability, smaller turning radius
- Improve operation comfort, reduce fatigue.
- A longer service life.

SDLG LG936L

Air-conditioning system

ALL

Feature:

- Improve the leakproofness of the cab.
- Large capacity air conditioning system.
- Inside and outside circulation with the air filter which on the outside.

Benefit:

- Noise reduction, sound insulation, heat insulation.
- 52 degrees ambient temperature in cabin down to 30 degrees in 5 minutes, 20 minutes to below 22 degrees.
- Purify air, easy to clean and replace filter.

Pallet Fork

E3623115A36
E3623115A29
E3626115A29

Feature:

- Pallet Fork.
- Effective length of prong:1800mm.
- Maximum width of two prongs outside:1700mm.
- The width between two prongs is adjustable.
- Max. dumping height:3531mm.
- Corresponding dumping distance:2613mm.

Benefit:

- Mainly to replace the forklift to perform fork loading of less translational motion requirement.
- Do some simple hoisting operation.

Vision & Mission

Our Vision

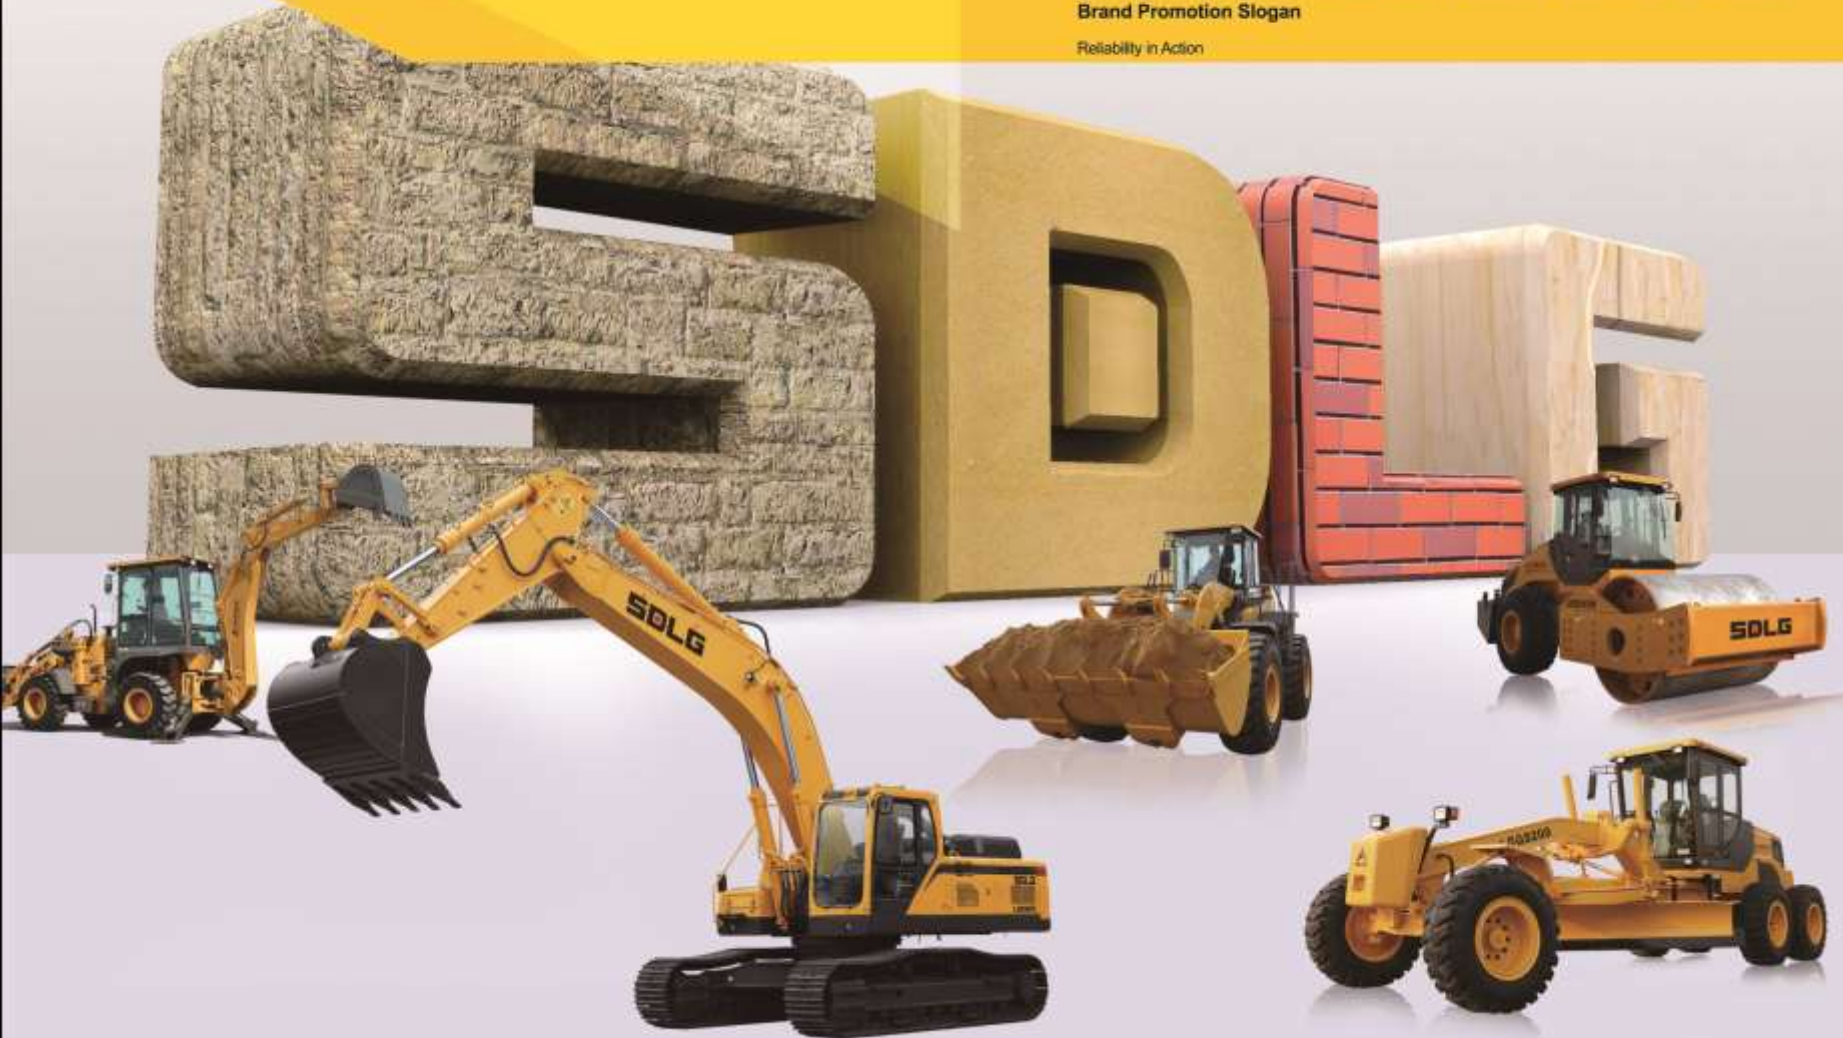

To become the No.1 Chinese construction equipment brand for reliability, customer satisfaction and Brand image in the construction machinery industry.

Our Mission

To provide highly reliable products and services in order to maximize our value in the eyes of the customer.

Brand Promotion Slogan

Reliability in Action

RELIABILITY IN ACTION
